

## **GWNZ Progress Report 2026 Jane Reeves**

In August 2025, I received a GWNZ fellowship. Thanks to this support, I was able to remain in full-time study for the final period of 2025 and beginning of 2026. As a result of this, I have completed a full draft of my Doctorate of Clinical Psychology thesis and have sent it to my research supervisors for final feedback. I intend to submit my thesis for examination by the end of March 2026. This timeline would not have been possible without the fellowship, and I am now in a position to enter the workforce without simultaneously having to work on my thesis. My ongoing thanks are extended to GWNZ for their invaluable support in the final months of my thesis.
